

BETTER LIVING THROUGH BETTER WATER

Nero UV

Nero Ultraviolet Disinfection Systems: UVB Series

Nero UV is an advanced Ultraviolet Water Treatment System. It has been designed with you, the consumer, in mind. Nero products are lightweight, easy to use, and simple to maintain. Nero products will provide you with clean, disinfected drinking water for years to come!

The Nero UVB Series is the most versatile commercial ultraviolet disinfection system on the market today. This 15 to 60 GPM series is manufactured with versatility in mind, and is virtually unlimited in the possible filter configurations and manifold sequences.

One advantage of the UVB series is the convenient manifold mounting rack. The rack can be used to configure up to four UV chambers in parallel order or in series. This allows the user to achieve a higher UV dosage, or a higher flow rate (up to 60 GPM).

Nero UV embodies our philosophy that there is no substitute for excellence when it comes to helping protect human health and well-being.

Features:

- Electronic lamp indicator (LED)
- Standard voltage 115V
- Water disinfection
- Easy to change lamp and filters
- Lamp and ballast matched for quality assurance
- Compatible with household appliances
